

Static

```
class Student {  
    String name;  
    int roll no;  
    static String schoolname;  
}
```

```
s1.schoolname = "DAV"  
Student s1 = new Student();  
Student s2 = new Student();  
s2.schoolname = "DAV"
```

→ library functions

↳ Math.abs() Math.sqrt() Math.min()

```
class Math {  
    static int abs() {  
    }  
    static int min() {  
    }  
}
```

↳ Can you access non static from static method?

↓
no

↳ Can you access static from non-static?

↓
yes
