Abstract

```
Class Pair {                    Interface I1 {

    void fun1 (){               void fun1 ();
    }
}                               }
```

                    methods on class

```
abstract Class Pair {
    int val;
        void fun1(){
        }
}

    abstract void fun2 ();
```

⮡ Can we create obj of abstract class?
    ⮡ NO

⮡ Can we have Constructor in abstract class?
    ⮡ yes

↳ Can we do multilevel inheritance
↳ yes

↳ Can we do multiple inheritance
↳ no
