Classes and objects

```
int n;                    String st;
n = 20;                   st = "Hello"
```

```
Class Student {
    int yoB;
    String name;

    void check() {
        print("Hello world");
    }
}
```

Student S1 = new Student()

S1.yoB = 1990;   S1.check()

S1.name = "Subhu";

Student S2 = new Student();

S2.yoB = 1999   S2.check()

S2.name = "Suthesh"
